

Ezekiel Ministry

The book of Ezekiel is a book of hope and a book showing the awesomeness of God. It is a book about the end times and the return of Jesus.

In times of uncertainty that we live in, believers need to be assured that God is with them. It is in the gut-wrenching experiences of life that we are most in need of God's presence and His great promises.

Studying end time prophecy will make us stronger Christians and it will give us hope knowing that God does keep His promises.

We pray that this ministry will be a place where you can find hope and become a stronger Christian. I cannot put everything that I would like to put in this newsletter. This is why I have a web site. I will be starting a new section on our web site with articles about the end times. Please check out our web site.

As always please keep us in your prayers.

A Ministry of Hope and Healing

“You are worthy, O Lord, to receive glory and honor and power; for You created all things, and by Your will they exist and were created.”

Revelation 4:11

April - May 2009

Ezekiel Ministry

Sharing the Light and Love of God to a Dark World

Last night we had a storm come through. It was one of those spring storms we have with lots of thunder, lightning and rain. As I sat on the front porch this morning, my mind turned to God and how pure and clean everything felt. God cleaned the air overnight with His storm. My mind turned to think about the end times. How we are seeing many storms right now. The economy world wide is in shambles, earthquakes are happening all over the world. I have read of volcanos world wide erupting. The world is being turned upside down. To the person that is seeking God and looking forward to His second coming, this storm is just like a spring storm in Alabama. Yes, there may be some damage, but God is purifying His world for His second coming. How glorious this time will be when we will all worship the King of Kings and the Lord of Lords.

I am writing on the end times more and more. I cannot get away from this subject. Every time I open the Bible it comes to scripture about the end times. I feel my spirit quicken when I read something in the paper that I know is just another sign.

“But if the watchman sees the sword coming and does not blow the trumpet, and the people are not warned, and the sword comes and takes any person from among them, he is taken away in his iniquity, but his blood I will require at the watchman’s hand.” (Ezekiel 33:6)

My purpose in writing about prophecy is not to make you fearful, but to make you aware of what is happening. Jesus tells us, “Watch therefore, for you know neither the day nor the hour in which the Son of Man is coming.” (Mathew 25:13)

We must be aware and know that time is drawing near when we will not be able to share the good news of Jesus Christ. Time is growing short. We must work while there is still light.

Officials cautioned that the motivation of the cyberspies wasn't well understood, and they don't see an immediate danger. China, for example, has little incentive to disrupt the U.S. economy because it relies on American consumers and holds U.S. government debt.

But protecting the electrical grid and other infrastructure is a key part of the Obama administration's cybersecurity review, which is to be completed next week. Under the Bush administration, Congress approved \$17 billion in secret funds to protect government networks, according to people familiar with the budget. The Obama administration is weighing whether to expand the program to address vulnerabilities in private computer networks, which would cost billions of dollars more. A senior Pentagon official said Tuesday the Pentagon has spent \$100 million in the past six months repairing cyber damage.

Overseas examples show the potential havoc. In 2000, a disgruntled employee rigged a computerized control system at a water-treatment plant in Australia, releasing more than 200,000 gallons of sewage into parks, rivers and the grounds of a Hyatt hotel.

Last year, a senior Central Intelligence Agency official, Tom Donohue, told a meeting of utility company representatives in New Orleans that a cyberattack had taken out power equipment in multiple regions outside the U.S. The outage was followed with extortion demands, he said.

Specialists at the U.S. Cyber Consequences Unit, a nonprofit research institute, said attack programs search for openings in a network, much as a thief tests locks on doors. Once inside, these programs and their human controllers can acquire the same access and powers as a systems administrator. (Wall Street Journal 4/8/09)

This article should be an eye opener for everyone. I know that there is lots of security on the power systems, but we need to be aware that this could happen. I believe that God wants us to know what is going on in the world. The good and the bad. We must be informed Christians. Please as Christians we are the only hope for this world, let's not bury our heads in the sand and say things like this will never happen. Let your light shine in the world so that the people with no hope will see there is hope in Jesus Christ.

Electrical Grid in US Penetrated by Spies

Cyberspies have penetrated the U.S. electrical grid and left behind software programs that could be used to disrupt the system, according to current and former national-security officials.

The spies came from China, Russia and other countries, these officials said, and were believed to be on a mission to navigate the U.S. electrical system and its controls. The intruders haven't sought to damage the power grid or other key infrastructure, but officials warned they could try during a crisis or war.

"The Chinese have attempted to map our infrastructure, such as the electrical grid," said a senior intelligence official. "So have the Russians."

The espionage appeared pervasive across the U.S. and doesn't target a particular company or region, said a former Department of Homeland Security official. "There are intrusions, and they are growing," the former official said, referring to electrical systems. "There were a lot last year."

Many of the intrusions were detected not by the companies in charge of the infrastructure but by U.S. intelligence agencies, officials said. Intelligence officials worry about cyber attackers taking control of electrical facilities, a nuclear power plant or financial networks via the Internet.

Authorities investigating the intrusions have found software tools left behind that could be used to destroy infrastructure components, the senior intelligence official said. He added, "If we go to war with them, they will try to turn them on."

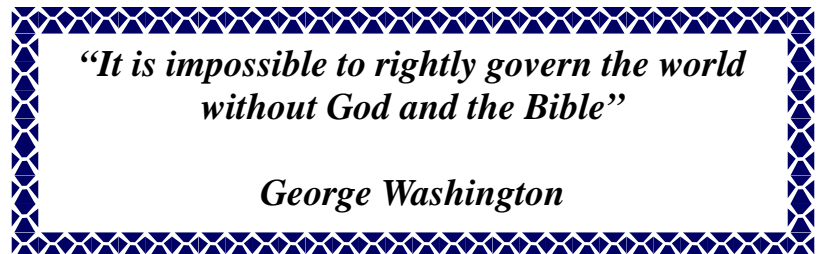

Officials said water, sewage and other infrastructure systems also were at risk. "Over the past several years, we have seen cyberattacks against critical infrastructures abroad, and many of our own infrastructures are as vulnerable as their foreign counterparts," Director of National Intelligence Dennis Blair recently told lawmakers. "A number of nations, including Russia and China, can disrupt elements of the U.S. information infrastructure."

I want you to understand that as I write on the end times I make no perditions of what is going to happen. I only want to give the facts and let you make up your own mind if we are living in the end times.

I just received my monthly newsletter from David Wilkerson. He really has a sobering warning for us all. He stated that he believed we would see riots and fires in the major cities of the world. I believe that we are heading for worse times and we need to be prepared. I have complete faith in God that He will take care of His people, but we need to do some planning for what you and your family will do during these times.

I just read an article that said that in order to be creative we need to get out of our comfort zone and change our environment. I know in the past six months God has changed my environment. With my health problems and arthritis in my knees it has been quite a change for me. It has changed my thinking and my perception of the world. I didn't feel this way at first. It is hard to stop doing things that you have done all your life. I love the woods and I feel so close to God when I am out in the woods hiking. Now I cannot hike because of my knees. Sunday afternoon I spent time in the woods on my four wheeler, not just riding in the woods but getting close to God and His nature. I knew a year ago that God had a change that was going to take place in my life. I never dreamed that this would be the change. I tell you this because maybe you are going through a storm and trouble in your life. If you are looking to God, see if maybe He is wanting to change your thinking and your environment so you can be more creative for Him.

"Peace I leave with you, My peace I give to you; not as the world gives do I give to you. Let not your heart be troubled, neither let it be afraid." (John 14:27)

Israel, God's Time Piece

“Without the existence of the nation of Israel, we would not be able to say with certainty that we are in the last days. That single event, more than any other, is the prominent sign that we are living in the final moments before the return of Jesus! The Hebrew people have been called God's time piece of the ages.” (Milton B Lindberg)

What has happened in Israel within the last 75 years is nothing but God's plan being fulfilled. If we look at the events that lead to Israel becoming a state, it is nothing but a miracle.

The story of Israel begins at the very beginning of the Bible. In the book of Genesis two chapters are given to creation, one chapter to the fall of man, eight chapters to the thousands of years from creation to the time of Abram. Thirty-eight chapters deal with the life of Abraham, Isaac, and Jacob, the progenitors of the Jewish race. God must think that the Jewish people are important.

Without the Jews, we would have no Bible. Without the Jews, there would be no Jesus. Without the Jewish Jesus, there would be no Christianity. Without the Jews there would be no Ten Commandments, the Law that has largely been the basis of jurisprudence and statutory proceedings among most of the civilized nations of the world.

Of all God's promises to Abraham, the most amazing is His promise concerning the land that God had given them. God told Abraham to leave his home and that God would lead him to the land that would belong to his descendants. This land is the land that Israel has today. Today the control of the promise land is one of the most volatile in international politics.

Ezekiel 36:24 tells us that God said, “I will take you from among the nations, gather you out of all countries, and bring you into your own land. This started to happen in 1948 when Israel became a state.

What happens in Israel is important to all of us as Christians. If you are a Christian walking with God and believing in Jesus you are part of the Jewish family. By believing in Jesus we were adopted into the family.

“For if you live according to the flesh you will die; but if by the Spirit you put to death the deeds of the body, you will live. For as many as are led by the Spirit of God, these are the Sons of God. For you did not receive the spirit of fear, but you received the spirit of adoption by whom we cry out, “Abba, Father.” The Spirit Himself bears witness with our spirit that we are children of God, and if children, then heirs - heirs of God joint heirs with Christ, if indeed we suffer with Him, that we may also be glorified together.” (Romans 8:13-17)

At this time in history God is gathering His people in together. On my web site I have a prophecy titled “Turn Your Face into the Wind.” This is about God purifying His people and I believe it is happening today. I want to shout it from the roof tops. ***Jesus is coming, be ready!***

“God is my witness that it is my constant anxiety and prayers that both myself and this nation should be on the Lord's side”

Abraham Lincoln
